

Slushy Machine

- 1) 2 people must carry
- 2) Do not set on card table, table must be sturdy
- 3) Plug machine directly into an outlet
- 4) Mix 2 gallons of water with ½ gallon of slushy mix
- 5) If using alcohol, do not add to bowl, it will cause the motor to fail. Add alcohol after slushy has been poured into glass
- 6) Pour mixture into hopper.
- 7) Turn power on “lightning bolt” switch top, left switch.
- 8) Turn auger on, if using both bowls, turn both augers on “half circle with arrow” two switches on bottom left side switch for both
- 9) Turn freezing system on “snowflake” bottom 2 switches, both on the right side.
- 10) Machine will take approximately 45 minutes to 1 hour to fully slush up.
- 11) If mixture is too frozen switch the freezing switch, “snowflake” to cooling switch, “raindrop”
- 12) Machine must be kept out of sun and heat.
- 13) When done with machine, unplug machine from electrical outlet, drain all remaining liquid from the bowls, rinse bowls out with water. Be very careful with the bowls – they are approximately \$200.00+ to replace.
- 14) You are not required to do any washing – Delano Rental is responsible for the main washing of the machine.
